DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 10 and 45 are rejected under 35 U.S.C. 102(anticipated) as being anticipated by Ross et al, US patent No. 5,859,628.

Ross et al disclose an apparatus and method for a personal onboard information system comprising: a housing 304 configured to allow a user to secure and remove a portable terminal 102; a power management system 108 for delivering power to the portable terminal when secured to the housing; a communication port 316 for communicating data from a vehicle cradle 104 to the portable terminal 102; and a GSP system locator coupled to said communication port for generating a location signal and transmitting said signal to the portable terminal, whereby the location of the motorized vehicle is transmitted to the portable terminal by the vehicle cradle (see figures 2, 3; col. 3 to col. 4, line 49 and col. 8, line 8+).

Application/Control Number: 09/487,923

Art Unit: 2876

Claim Rejections - 35 USC § 103

Page 3

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been always at the time the invention and the prior art are

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

4. Claims 39-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ross et al in

view of Ruppert et al, US Patent No. 5,640,002. The teachings of Ross et al have been discussed

above.

Ross et al fail to disclose or fairly suggest that a communication network for

communicating an order from the remote computer to a central server.

Ruppert et al disclose a portable RF ID TAG and bar code reader comprising: means for

users to select items from a list or a plurality of list to enter an order selection for items to be

purchased using GSP interface (see col. 6, lines 10-44).

In view of Ruppert et al's teaching, it would have been obvious for a person of ordinary

skill in the art at the time the invention was made to modify the system of Ross et al by

incorporating the shopping capability into the system so that users can conveniently shop and

update the their travel plan while driving or at any remote location. Such modification would

provide much greater flexibility and convenience wherein individuals could either purchase

travel items while traveling to their destination, before departure, or at their destination.

Therefore, it would have been an obvious extension as taught by Ross et al.

Response to Arguments

Art Unit: 2876

5. Applicant's arguments with respect to claims 10 and 39-45 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moore, US Patent No. 6,035,191, discloses a standby operation in a wireless communication device. Herrod et al, US Patent No. 6,405,049, disclose a portable data terminal and cradle.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel St.Cyr whose telephone number is 703-305-2656. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G Lee can be reached on 703-305-3503. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7721 for regular communications and 703-308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
